

WireQueue

Secure internet messaging for LabVIEW & LabVIEW RT

- Are you looking for a secure way to connect to your LabVIEW RT targets over internet?
- Do you want to include your smartphone too?

WireQueue is a service for secure communication over the internet, specifically designed for LabVIEW. Your LabVIEW devices can publish and subscribe to topics containing measurement, control and alarm messages. The WireQueue message broker sends them to all subscribers, including web browsers and mobile apps. The WireQueue Toolkit runs on both LabVIEW & LabVIEW RT.

Features

- Open publish/subscribe protocol
- Secured with SSL/TLS
- Low bandwidth
- Push notifications
- Opt. Hardware dongle message authentication

Supported Platforms

- LabVIEW (Win/Mac)
- LabVIEW RT (Pharlap/VxWorks/LinuxRT)
- Android
- iOS
- Web browser
